

# HOW CAN WE GROOM FOR YOU?

Please note that grooming costs are always calculated after a careful inspection of your dog's coat length, texture, and condition by our skilled groomer. Costs are provided by the groomer as a custom quote for your dog as an individual - please contact our groomer directly for pricing of our grooming services.

## SPECIALTY SPA TREATMENTS

FURminator

*FURminator® Package: Includes a soak and massaging bath first to separate your pet's coat, stimulate hair follicles and invigorates circulation. The FURminator® De-Shedding solution is then applied. This specially formulated all-natural solution helps to loosen the undercoat and loose hair. Next a high velocity dryer separates and eliminates the excess coat and loose hair. This targeted blow-drying process is followed by thorough brushing and combing. Lastly the special FURminator® tool is used to extract loose hair and undercoat from your pet, leaving only the shiny and healthy topcoat. First treatment reduces shedding by 60 to 80%*

Whitening

*Whitening Shampoo: This specialized shampoo used the properties of natural enzymes and powerful optical brighteners in a palm and coconut base of cleansing agents to brighten white coats, remove tear stains and other organic stains.*

Zymox

*Zymox® Shampoo For Itchy, Inflamed Skin: The first line of defense against infectious microbes is the skin. ZYMOX® Shampoo provides an effective way to protect this natural barrier without being irritating or drying. Only the mildest plant surfactants are used and the enzymes have anti-inflammatory properties to calm the skin. The LP3 Enzyme System with the addition of Vitamin D3 helps relieve surface irritations and hydrate the skin. The shampoo contains no harsh detergents, chemicals or petroleum bi-products and features a pleasant, mild fragrance.*

Additional notes or requests from owner:
